An apartment house restoration in Bucha, the Kyiv region

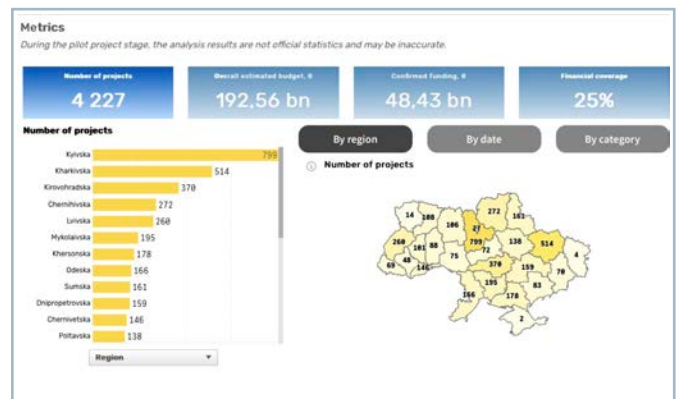

*As of May 20th, 2024, according to regional military administrations since February 24th, 2022

RESTORATION PROJECTS: DREAM ANALYTICS**

Digital Restoration Ecosystem for Accountable Management—DREAM* is the state digital platform for implementing restoration projects supported by the Ministry for Restoration.

4227 projects have been added to DREAM since the launch of its beta testing in September 2023. The number of projects by sector includes **the education sector** — 1671 projects; **housing** — 616 projects; **the healthcare sector** — 489 projects; **the water supply, sanitation, and waste management sector** — 437 projects; **the transport sector** — 328 projects.

- Top 10 regions according to the number of projects in the DREAM:**
- Kyiv
 - Kharkiv
 - Kirovohrad
 - Chernihiv
 - Lviv
 - Mykolaiv
 - Kherson
 - Odesa
 - Sumy
 - Dnipro

*Digital Restoration Ecosystem for Accountable Management (DREAM) is the state digital platform for implementing restoration projects. DREAM collects, organizes, and publishes open data across all stages of reconstruction projects in real time, implementing the highest standards of transparency and accountability.

** DREAM collects, organizes, and publishes open data across all stages of restoration projects in real time, implementing the highest standards of transparency and accountability. As of now, DREAM contains only a part of restoration projects. The legislation ensuring all restoration projects are included in DREAM mandatory is being developed.

All the data on projects in DREAM is available on the public [portal](#) and via the business intelligence [module](#). At the pilot project stage, the analysis results are not official statistics and may need more accuracy. Join the DREAM and find more information concerning investment projects on dream.gov.ua or write to info@dream-office.org

THE RECONSTRUCTED CHECKPOINT IN RENI IS OFFICIALLY OPENED

Joint customs and border control launched at Reni - Giurgiulesti checkpoint

Reni International Automobile Checkpoint is ready to launch joint customs and border control between Ukraine and Moldova. The

Ukrainian checkpoint, which was not operating, has been undergoing repairs for the past few months.

The Ukrainian and Moldovan sides have officially agreed to complete the work and launch joint control on the Ukrainian side.

**Serhii DERKACH,
Deputy Minister for
Communities, Territories
and Infrastructure
Development of Ukraine:**

Launching full-fledged joint control is the first step in implementing the Green Corridor initiative between the Ukrainian Reni checkpoint, Moldovan Giurgiulesti, and Romanian Galati. The launch of joint control on the Ukrainian side, a significant milestone, will increase the capacity of this section of the border. Currently, up to 50 trucks pass through Reni per day. Our goal is to double this number, at least. The next step in the Green Corridor initiative is to launch coordinated control at the Romanian checkpoint with our Moldovan colleagues, which will open a fast route and corridor to the Romanian port of Galati.

During the reconstruction, three floors and the facade of the administrative building were renovated. The sanitary facilities at the checkpoint were also renovated. In addition, the road surface was replaced, and road signs and information signs were updated and installed.

The Odesa Region Restoration and Infrastructure Development Service carried out the repair work.

In addition to trucks, buses will be subject to joint control, with a separate lane and a terminal at the checkpoint. This will reduce passengers' waiting time.

In October 2023, the Ministry for Restoration began negotiations with Moldova and Romania to create a "green corridor" between the Reni - Giurgiulesti - Galati checkpoints. The fundamental goal was to speed up the movement of goods and exports of Ukrainian agricultural products.

The full launch of the "green corridor" envisages further development of the Reni checkpoint, reconstruction of the Reni—Galati road and its expansion from 2 to 4 lanes, and additional technical equipment for the checkpoints.

UN-HABITAT EXPERIENCE IN COMMUNITY RESTORATION PLANNING

UN-HABITAT to join planning for recovery of Ukrainian communities

The Ministry for Communities, Territories and Infrastructure Development of Ukraine team, in a testament to the resilience of the Ukrainian communities, met with representatives of the United Nations Human Settlements Programme (UN-HABITAT), headed by Secretary-General and Acting Executive Director of UN-Habitat Michal Mlynár.

During the meeting, Deputy Minister for Communities, Territories and Infrastructure Development of Ukraine Natalia Kozlovska presented the progress in the planning doc-

uments system and in developing the DREAM ecosystem, the urban planning cadastre,

and the Geographic Information System (GIS) for Regional Development.

The priorities of recovery and sustainable development of communities in Ukraine also outlined the main areas of cooperation.

International partners from UN-HABITAT, based on their global experience and expertise, will provide support to Ukraine in several areas:

- Support for spatial planning for

urban regeneration;

- Advice at the national level (related to housing policy, municipal finance, digital urban governance);
- Knowledge and capacity building/development to strengthen spatial planning capacities and urban planning expertise;
- Implementation of best practices in the use of digital tools for spatial planning.

- The United Nations General Assembly mandates UN-HABITAT to promote socially and environmentally sustainable cities. UN-HABITAT works with partners to build inclusive, safe, resilient cities and communities by fostering urbanization and reducing inequality, discrimination, and poverty. UN-Habitat has gained experience implementing such projects, participating in post-conflict reconstruction in Syria, Yemen, Lebanon, and Kosovo countries, and globally advising national and regional governments.

Natalia KOZLOVSKA,
Deputy Minister for Communities, Territories and Infrastructure Development of Ukraine:

The main goal is to ensure that local governments have a comprehensive vision of how the community should develop and what needs each particular territory has, given its specifics: whether it is a liberated territory or a territory with many internally displaced persons, etc. This should be a long-term strategic vision of local development. It is about restoring housing and developing the economy, municipal infrastructure, public utilities, and energy efficiency. We need to create full-fledged conditions under which territorial communities will have sustainable development, and people can return home or have the potential to stay in a new place.

HOUSING RESTORATION IN BUCHA

Significant repairs are underway to two apartment buildings in Bucha damaged by Russian shelling in 2022

An apartment building on Yablunska Street:

- load-bearing walls reinforced with metal structures
- interior partitions were installed in the destroyed apartments
- the floor of the 1st floor was insulated, and window structures were installed
- balconies were glazed, and their external insulation is ongoing
- monolithic slabs are installed, and facade works are being completed
- tiles are being laid, and surfaces are being painted in common areas
- fencing of staircases is being restored in the 2nd and 3rd sections of the building
- continue to lay electrical cables and restore the parapet roof tiles of the 4th section

The house is being restored at the expense of the Fund for the Elimination of the Consequences of the Armed Aggression of the Russian Federation. The 144 residents will be able to return to their renovated apartments upon completion of the works.

An apartment building on 17/6 Borys Hmyrya Street:

- The restoration works are concentrated on the fifth section of the building
- windows and balcony blocks have been installed, and glazing has been completed from the first

to the third floor.

The 110 residents will be able to return to their renovated apart-

ments upon completion of the works. The renovated section of the building will become energy efficient.
