Social, sports, and cultural facilities	1 850	258
Healthcare	1 631	427
Roads	1045	194
Administrative and Centres of administrative services	959	159
Others	11796	731

A bridge restoration in the Odesa region

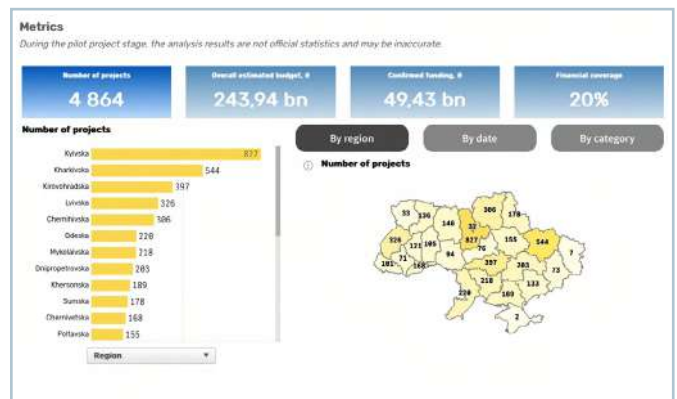

*As of June 7th, 2024, according to regional military administrations since February 24th, 2022

RESTORATION PROJECTS: DREAM ANALYTICS**

The Digital Restoration Ecosystem for Accountable Management (DREAM) is not just a state digital platform for implementing restoration projects. It's a powerful tool that underscores our unwavering commitment to transparency and accountability.

4864 projects have been added to DREAM since the launch of its beta testing in September 2023. The number of projects by sector includes **the education sector** — 2114 projects; **housing** — 624 projects; **the healthcare sector** — 530 projects; **the water supply, sanitation, and waste management sector** — 497 projects; **the transport sector** — 337 projects.

- Top 10 regions according to the number of projects in DREAM:**
- Kyiv
 - Kharkiv
 - Kirovohrad
 - Lviv
 - Chernihiv
 - Odesa
 - Mykolaiv
 - Dnipro
 - Kherson
 - Sumy

*Digital Restoration Ecosystem for Accountable Management (DREAM) is the state digital platform for implementing restoration projects. DREAM collects, organizes, and publishes open data across all stages of reconstruction projects in real time, implementing the highest standards of transparency and accountability.

** DREAM collects, organizes, and publishes open data across all stages of restoration projects in real time, implementing the highest standards of transparency and accountability. As of now, DREAM contains only a part of restoration projects. Legislation ensuring all restoration projects are included in DREAM is being developed.

All the data on projects in DREAM is available on the public [portal](#) and via the business intelligence [module](#). At the pilot project stage, the analysis results are not official statistics and may need more accuracy. Join the DREAM and find more information concerning investment projects on dream.gov.ua or write to info@dream-office.org

UKRAINIAN RECOVERY CONFERENCE IN BERLIN

The URC2024 takes place under the motto “United in defense. United in recovery. Stronger together.”

It is a continuation of the annual series of high-level political events dedicated to the swift recovery and long-term reconstruction of Ukraine since the beginning of Russia’s full-scale war of aggression against Ukraine.

It is also the first Ukraine Recovery Conference hosted in an EU member state and comes at a critical time for Ukraine.

The conference will reflect the Lugano principles, including a “whole of society” approach to recovery through the meaningful participation of a broad range of stakeholders. Upholding the spirit of the Ukraine Reform Conferences that took place up until 2022, the URC2024 will also showcase Ukrainian reform progress in the context of its economic resilience and the EU accession process.

The key goal of the URC2024 is to mobilize continued international support for recovery, reconstruction, reform, and modernization of Ukraine. This includes providing emergency assistance for immediate needs, implementing rapid recovery projects and creating attractive conditions for businesses to unlock the private sector investments in Ukraine, and civil society to actively engage in the reconstruction process.

The URC2024 will focus on the following four thematic dimensions:

- Business Dimension – Mobilizing the Private Sector for Reconstruction and Economic Growth
- Human Dimension – Social Recovery and Human Capital for the Future of Ukraine
- Local and Regional Dimension – Recovery of Municipalities and Regions
- EU Dimension – EU Accession and Related Reforms

INVESTMENT AS A TOOL FOR COMMUNITY CAPACITY BUILDING

The victory is not only about defending our statehood and

defeating russia. Victory is also about rebuilding and renewing Ukraine as a state that serves the interests of people, Acting Minister for Communities, Territories

and Infrastructure Development of Ukraine Vasyl Shkurakov said during the opening of the Ukraine Recovery Conference.

Vasyl Shkurakov emphasized the importance of jointly developing standardized approaches

to housing and infrastructure reconstruction. At the same time, recovery plans should take into

account modern technologies inherent in Industry 4.0, such as the use of drones and robotics.

Vasyl SHKURAKOV, Acting Minister for Communities, Territories and Infrastructure Development of Ukraine:

Investments should work to return Ukrainian citizens to their homeland and restore life in the affected areas. We need a new, modern vision of

Ukrainian cities and villages. At the same time, investments should be a tool to increase the capacity and resilience of communities, engage them in international cooperation, and support their local, unique products. I am grateful to the international partners who support Ukraine's recovery.

UKRAINE SIGNED A LOAN AGREEMENT WITH CEB TO COMPENSATE FOR DESTROYED HOUSING

During the Ukraine Recovery Conference (URC), representatives of the Council of Europe Development Bank (CEB) and the Government of Ukraine signed a EUR 100 million loan agreement under the HOME: Compensation for Destroyed

Residential Property project. The project will be implemented by the Ministry for Communities, Territories and Infrastructure Development of Ukraine. According to HOME, priority will be given to supporting the most vulnerable people, including combatants, people with disabilities, and large families. It is expected that over 2000 families will receive new housing with CEB funds.

Natalia KOZLOVSKA, Deputy Minister for Communities, Territories and Infrastructure Development of Ukraine:

The launch of cooperation with the CEB gives Ukrainian citizens confidence that their request for justice has been heard. As a result of the agreement signed today, more than two thousand families whose homes were destroyed will be able to receive compensation and rebuild their homes. It was a year ago that the compensation mechanism was launched, and it was a year ago that Ukraine became a member of the Bank, and now we have the first promising project. I am confident that it will be the beginning of our long-term productive cooperation.

UKRAINE AND GREECE SIGNED AN AGREEMENT ON 100 TRANSPORTATION PERMITS

Ukraine and Greece reached an agreement on 100 permits for irregular passenger transportation

The Ministry for Communities, Territories, and Infrastructure Development has agreed with the Ministry of Infrastructure and Transport of Greece on obtaining permits for irregular

transportation between the two countries.

Ukrainian carriers heading to Greece can direct logistics to the final destination without transferring passengers to foreign buses.

In 2024, the Ministry for Communities, Territories and Infrastructure Development team of Ukraine agreed to increase the number of permits for irregular transportation with Türkiye, Romania, and Montenegro.

Serhii DERKACH, Deputy Minister for Communities, Territories and Infrastructure Development of Ukraine:

Last year, Ukrainian carriers did not have permits for irregular transportation to Greece. This significantly limited our carriers' capabilities, especially

given that bus transportation is now a priority due to the need for air service. This year, we reached an agreement on 100 permits for irregular transportation. We continue to work to increase this number and ensure comfortable and safe conditions for transportation.

IMPROVING THE HOUSING MARKET IN UKRAINE

The World Bank will support the public and private sectors in improving the housing market in Ukraine

The Government of Ukraine signed a memorandum with the World Bank and the International Finance Corporation. The task is not only to restore damaged and destroyed housing, but also to modernize the overall housing policy in line with EU standards.

The Ministry for Communities, Territories and Infrastructure Development of Ukraine together with international organizations is working on developing a new housing policy, in particular the draft Law of Ukraine "On the Basic Principles of Housing Policy", which is the basis

for introducing the concept of a new housing policy and implementing housing reform in Ukraine. The draft law provides for the further development of a set of tools for implementing the new housing policy, including a national housing strategy.

According to the Memorandum: "Ukraine has taken steps to begin reforming the housing sector with the aim of creating an efficient housing ecosystem with active private sector

participation that would stimulate growth in many areas of the economy and make a significant contribution to Ukraine's economic resilience. To this end, Ukraine is finaliz-

ing a comprehensive housing policy framework, which will be followed by the preparation of various instruments, including a national housing strategy."

HOUSING POLICY REFORM IN UKRAINE

World Bank Group representatives continue consultations on housing policy reform in Ukraine.

An apartment house restoration in Zaporizhzhia

At a meeting with a delegation of representatives of the World Bank Group and the Ministry for Communities, Territories, and Infrastructure team, we discussed a further work plan for reforming Ukraine's housing policy. The main areas of further cooperation include supporting the government in preparing the state housing strategy for Ukraine. The Global Plan for Ukraine also includes reforming the housing policy to implement the EU's Ukraine Facility assistance program.

These amendments were developed with the assistance and direct participation of experts and consultants from the United Nations High Commissioner for Refugees, the United Nations Economic Commission for Europe, the Norwegian Refugee Council, the International Organization for Migration, the Council of Europe

Office in Ukraine, the European Investment Bank, the World Bank, the European Commission, as well as representatives of civil society organizations.

Drafting the Law on the Basic Principles of Housing Policy is the first step in updating housing legislation and reforming the housing and communal sector.

The Ministry for Communities, Territories, and Infrastructure Development of Ukraine is also working on establishing an Interagency Working Group to develop the State Housing Strategy. This strategy, in particular, envisages the development of two more draft laws:

- On amendments to the Law of Ukraine "On the Housing Fund for Social Purposes
- On the management of housing funds.

Natalia KOZLOVSKA,
Deputy Minister for
Communities, Territories
and Infrastructure
Development of Ukraine:

We have seen positive approval of the proposed directions for housing policy reform, which are reflected in the draft law "On the Basic Principles of Housing Policy." After several sessions of broad public discussion, the proposals received were carefully studied and processed to ensure they were considered as much as possible. Today, we have a genuinely high-quality draft law that meets European standards and the principles of sustainable development declared by international acts.

GREENDIM – A NEW ENERGY-EFFICIENT PROGRAM

The Energy Efficiency Fund has received its first application for participation in the GREENDIM Program.

A condominium in Drohobych, the Lviv region, applied. The apartment building is home to 104 families. Comprehensive energy efficiency measures were already implemented there under the ENERGODIM Program earlier.

Now, the condominium is participating in another Energy Efficiency Fund program, GREENDIM. After receiving the conclusions of the energy audit, the condominium chose to install a 36 kW solar power plant. The cost of the equipment is about UAH 1.4 million.

If the project is successfully implemented, the Energy Efficiency Fund will reimburse 70% of the costs of the equipment and energy audit that the HOA has already conducted.
