Restoration of a bridge in the Kharkiv region

*As of July 19th, 2024, according to regional military administrations since February 24th, 2022

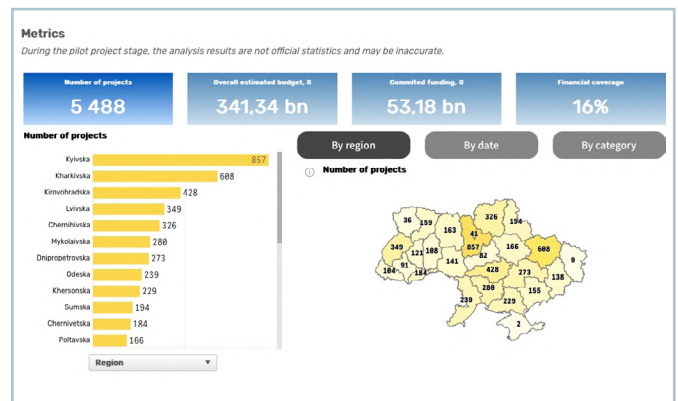

RESTORATION PROJECTS: DREAM ANALYTICS**

The Digital Restoration Ecosystem for Accountable Management (DREAM) is a significant milestone in Ukraine’s restoration efforts. It’s not just a state digital platform for implementing restoration projects but a powerful tool that underscores our unwavering commitment to transparency and accountability.

5488 projects have been added to DREAM since the launch of its beta testing in September 2023. The number of projects by sector includes **2416** projects created in the Education sector **660** projects created in the Housing sector **592** projects created in the Healthcare sector **548** projects created in the Water, Sanitation, and Waste management sector **401** projects created in the Transportation sector DREAM Analytics*

Top-10 regions according to the number of projects in the DREAM:

- Kyiv
- Mykolaiv
- Kharkiv
- Dnipro
- Kirovohrad
- Odesa
- Lviv
- Kherson
- Chernihiv
- Sumy

*Digital Restoration Ecosystem for Accountable Management (DREAM) is the state digital platform for implanting restoration projects. DREAM collects, organizes, and publishes open data across all stages of reconstruction projects in real time, implementing the highest standards of transparency and accountability.

** DREAM collects, organizes, and publishes open data across all stages of restoration projects in real time, implementing the highest standards of transparency and accountability. As of now, DREAM contains only a part of restoration projects. Legislation ensuring all restoration projects are included in DREAM is being developed.

All the data on projects in DREAM is available on the public [portal](#) and via the business intelligence [module](#). At the pilot project stage, the analysis results are not official statistics and may need more accuracy. Join the DREAM and find more information concerning investment projects on dream.gov.ua or write to info@dream-office.org

THE GOVERNMENT DELEGATION VISITED CZECHIA

The Government team headed by Prime Minister of Ukraine Denys Shmyhal visited Prague

Vasyl SHKURAKOV, Acting Minister for Communities, Territories and Infrastructure Development of Ukraine:

Our priorities and central areas of cooperation must coincide. We have common interests in developing passenger rail service and road transportation. Another critical topic is cooperation in rebuilding Ukraine.

Within the Joint Consultations between Ukraine and the Czechia, Acting Minister for Communities, Territories and Infrastructure of Ukraine Vasyl Shkurakov held a bilateral meeting with Minister of Transport of the Czech Republic Martin Kupka.

During the meeting, the Acting Minister discussed further steps of cooperation in the transport sector and thanked his Czech colleagues for their contribution to the restoration of the Dnipro region and strong support of the Ukrainian state.

CONNECTING EUROPE FACILITY

The European Commission has approved all projects submitted by Ukraine under the Connecting Europe Facility (CEF) program.

- **“Integration of the Ukrainian railway system into the EU transport system. Stage 1”**

The project envisages improving the railway network and developing the 1435 mm gauge to ensure technological compatibility and increase the capacity of the railway infrastructure.

- **“Organization of traffic flows to increase the infrastructure capacity, safety, and efficiency of border crossing services on the common road Romania-Moldova-Ukraine checkpoint Galati/Giurgiulesti/Reni.”**

The project was developed and submitted jointly with Moldovan and Romanian colleagues. Its implementation will ensure the continuity of traffic between these checkpoints.

- **“Ukrainian River Information Service on the Danube River - UkrRIS on the Danube River”**

The project aims to create and implement a river information service on the Ukrainian part of the Danube River, including its integration into the EuRIS and CEERIS portals of the RIS COMEX project. It also aims to ensure an adequate level of navigation safety and provide

harmonized information services to ships on inland waterways.

- **“Integrated Modernization of the European CNS Network”**

The project focuses on restoring Ukraine’s air navigation industry and further modernizing the infrastructure for communication, navigation, surveillance, and aeronautical information.

Serhii DERKACH, Deputy Minister for Communities, Territories and Infrastructure Development of Ukraine:

All projects are primarily European integration projects. They physically bring Ukraine closer to the European Union, expand the capabilities of transport corridors to move

goods and services and accelerate the integration of Ukrainian transport infrastructure into the EU transport space. A feature of the CEF program is co-financing for project implementation in 50%. The EU grant will amount to approximately EUR 53 million, with the same amount to be provided by the Ukrainian side from available funding sources.

AN APARTMENT BUILDING RESTORED IN THE KYIV REGION

The first apartment building was restored in the Kyiv region as part of cooperation with UNITED24

Before

The first of 18 apartment buildings in the Kyiv region has been implemented thanks to funds raised by the United24 fundraising platform for the “Rebuilding Ukraine” project.

It is a five-story apartment building in Irpin. In March 2022, russians fired incendiary shells at the building. All the apartments on the fifth floor burned to the ground. Another

part of the apartments was burned down due to tank shelling.

The cost of repairs amounted to UAH 77.79 million. The reconstruction of the building was based on the principle of Build Back Better. The renovation project included, among other things, the restoration of walls and ceilings, roofs, and windows,

replacement of windows and doors, restoration of facade walls and their insulation, restoration of the sewage and water supply systems, repair of the heating system, and interior decoration of apartments.

Thanks to the project, 325 residents will return to their apartments. The project card is available on [DREAM](#).

The reconstruction of 18 houses within the framework of the "Reconstruction of Ukraine" program began in January 2023 in the Kyiv region: in Irpin, Borodianka, Hostomel, and the villages of Buzova and Myla of the Dmytrivska community.

Upon completion of the reconstruction, more than 4,000 residents of these communities will be able to return to their homes.

Thanks to UNITED24 donors from 110 countries, more than UAH 720 million has

been raised to rebuild homes. The reconstruction is also partially funded by the state budget and contributions from local authorities and residents of these houses, who began restoration work immediately after the liberation of the Kyiv region.

After

Natalia KOZLOVSKA, Deputy Minister for Communities, Territories and Infrastructure Development of Ukraine:

People must have the opportunity to return to their homes. The Government of Ukraine and its international partners are doing a tremendous job of launching compensation mechanisms for

damaged and destroyed housing. We are also grateful to donors and UNITED24 ambassadors who have contributed to the fundraising for the recovery. It is also essential that the systematic restoration of housing infrastructure considers modern standards of energy efficiency, barrier-free accessibility, and environmental impact.
