Administrative and Centres of administrative services	993	166
Others	12 385	784

Restoration of damaged hospital in Trostianets, the Sumy region

**As of August 30th, 2024, according to regional military administrations since February 24th, 2022*

RESTORATION PROJECTS: DREAM ANALYTICS**

The Digital Restoration Ecosystem for Accountable Management (DREAM) is a significant milestone in Ukraine's restoration efforts. It's not just a state digital platform for implementing restoration projects but a powerful tool that underscores our unwavering commitment to transparency and accountability.

7308 projects have been added to DREAM since the launch of its beta testing in September **2023**.

The number of projects by sector includes:

2879 projects created in the Education sector

1002 projects created in the Healthcare sector

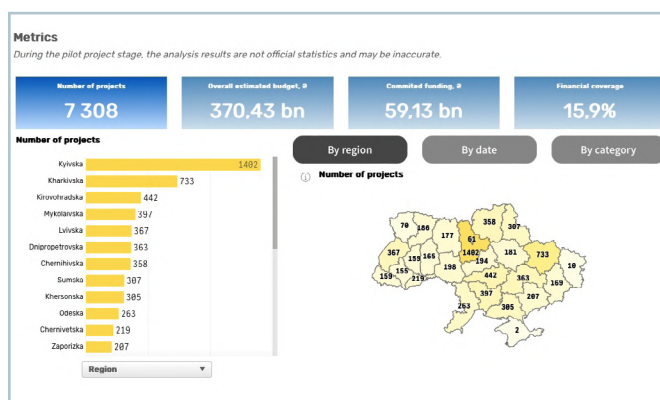

793 projects created in the Housing sector

809 projects created in the Water, Sanitation, and Waste management sector

629 projects created in the Transport sector

Top 10 regions according to the number of projects in the DREAM:

- Kyiv
- Kharkiv
- Kirovohrad
- Mykolaiv
- Lviv
- Dnipro
- Chernihiv
- Sumy
- Kherson
- Odesa

**Digital Restoration Ecosystem for Accountable Management (DREAM) is the state digital platform for implanting restoration projects. DREAM collects, organizes, and publishes open data across all stages of reconstruction projects in real time, implementing the highest standards of transparency and accountability.*

*** DREAM collects, organizes, and publishes open data across all stages of restoration projects in real time, implementing the highest standards of transparency and accountability. As of now, DREAM contains only a part of restoration projects. Legislation ensuring all restoration projects are included in DREAM is being developed.*

All the data on projects in DREAM is available on the public [portal](#) and via the business intelligence [module](#). At the pilot project stage, the analysis results are not official statistics and may need more accuracy. Join the DREAM and find more information concerning investment projects on dream.gov.ua or write to info@dream-office.org

COOPERATION WITH JAPAN

The Government of Japan is preparing a grant under the Grant Aid to Ukraine Programme for Emergency Recovery

Acting Minister for Communities, Territories and Infrastructure Development of Ukraine Vasyl Shkurakov and Ambassador Extraordinary and Plenipotentiary of Japan to Ukraine Matsuda Kuninori discussed possible areas of further cooperation. Vasyl Shkurakov thanked the Japanese Government and people for their assistance and outlined Ukraine's most urgent needs. Ambassador Matsuda Kuninori said the Japanese government is preparing another grant assistance project for Ukraine. Therefore, the Japanese must understand the needs and challenges in restoring the Ukrainian state.

**Vasyl SHKURAKOV, Acting
Minister for Communities,
Territories and Infrastructure
Development of Ukraine:**

Everything the Japanese people do is related to the environment and energy efficiency. In addition, the Japanese side always consistently fulfills its obligations. Therefore, the cooperation established between our nations will only deepen and develop. Ukraine currently has many needs, but the most

important thing today is to create and protect the energy system, which the enemy is constantly trying to destroy. Access to drinking water remains an equally important issue. Now, our country is facing the task of building a system of ecological and high-quality water supply, particularly in the Mykolaiv and Kherson regions. Other priorities include restoring housing, improving energy efficiency, and rebuilding damaged transport infrastructure.

JAPAN DONATED SPECIAL EQUIPMENT

The Government of Japan donated about 100 pieces of heavy machinery and equipment to four regions of Ukraine

As part of the Emergency Recovery Program between the Japan International Cooperation Agency (JICA)

and the Government of Ukraine, municipal utilities in Kharkiv, Dnipro, Kherson, and Mykolaiv received 97 pieces of

heavy equipment to improve transportation, water supply, and waste management following the devastation.

In addition, many generators, pipes, and other essential equipment will be transferred to utility companies to restore basic services.

The Grant Agreement for the Emergency Recovery Program

between the Japan International Cooperation Agency (JICA) and the Government of Ukraine was signed on March 9, 2023. It provides a USD 172.75 million grant from the Government of Japan to implement the Emergency Recovery Program.

**Vasyl SHKURAKOV,
Acting Minister for
Communities, Territories
and Infrastructure
Development of
Ukraine:**

Thanks to the Grant Agreements signed in early 2023 between the Ministry and JICA, Ukrainian cities have received much-needed assistance for their utilities. We continue cooperating with the Government of Japan and JICA in the identified areas and hope to expand it. We will make every effort to ensure that the assistance from the Japanese side is utilized in the most transparent and accountable manner possible.

BELGIUM TO HELP RESTORE KYIV AND CHERNIHIV REGIONS

Belgium assumes patronage over Kyiv and its region, Chernihiv and its region, and plans to allocate €150 million to rebuild social and energy infrastructure

Vasyl Shkurakov, Acting Minister of Community Development, Territories and Infrastructure of Ukraine, and Dirk Desprez, Director of the Belgian Development Agency Enabel in Ukraine, signed the relevant memorandums. Luc Jacobs, the newly appointed

Ambassador of Belgium to Ukraine, also attended the ceremony. He emphasized that this is his second mission to Ukraine as Ambassador, but he has already observed a significant expansion of cooperation between Ukraine and Belgium. In his opinion, this indicates

the consolidation of efforts to restore Ukraine. The ambassador emphasized that the security agreement signed by Ukraine's President Volodymyr Zelenskyy and Belgium's Prime Minister in May this year is a guide and a basis for strengthening our cooperation in the coming years.

The parties signed a Memorandum of Understanding between the Ministry for Communities, Territories and Infrastructure Development of Ukraine, Kyiv Regional Administration, Kyiv City Council, and Enabel and a Memorandum of Understanding between the Ministry, Chernihiv Regional

Administration, Chernihiv City Council, and Enabel.

According to the documents, the parties will reconstruct, renovate, and build educational, healthcare, and energy infrastructure facilities. Ukraine and Belgium will also cooperate to strengthen our country's resilience

by building shelters and introducing backup power and heating systems. The parties also agreed to promote the development of partnerships between Belgian and Ukrainian representatives. Support for political reforms that meet the goals of Ukraine's integration into the EU was also emphasized.

RESTORED KINDERGARTEN IN THE KYIV REGION

A kindergarten for 120 children has been restored in Borodianka

The restored kindergarten Pinocchio opening ceremony was held in Borodianka, Kyiv region. Lithuania's Central Project Management Agency (CPVA) implemented the project to equip the kindergarten. Lithuania and Taiwan have allocated 500,000 euros for this purpose.

The Pinocchio kindergarten is one of three kindergartens in

Borodianka that the russians destroyed. The kindergarten was damaged during russian attacks in early March 2022.

Pinocchio was reconstructed at the expense of the American NGO Hope Foundation. However, to ensure an uninterrupted educational process, the external infrastructure must be repaired, and the interior must be

equipped. The project consisted of improving and restoring the external infrastructure of the kindergarten, building playgrounds with paths and gazebos, purchasing furniture and equipment, including tables, sports equipment, and a kitchen, and arranging play areas.
