# RESTORATION DIGEST

The 71<sup>st</sup> Issue

1000 days after the russian full-scale invasion of Ukraine,  
the picture made by Nikita Titov, the artist from Kharkiv

DAYS UKRAINIANS HAVE BEEN  
FIGHTING ON THE SIDE OF LIGHT

DAYS SINCE THE WORLD  
FOUND OUT ABOUT THIS

**DON'T BE ON  
THE DARK SIDE!**

KYIV, NOVEMBER 25<sup>TH</sup>, 2024

## DEAR FRIENDS, COLLEAGUES, AND PARTNERS!

Another challenging week is behind. With President Volodymyr Zelenskyy, we visited Kupiansk and held a meeting on the operational situation in the region. There were reports on the Kupiansk sector and other defense issues.

Special attention was paid to humanitarian challenges. In particular, during the heating season in the frontline communities, it is essential to provide

people with heat, water, and electricity despite the constant shelling.

We are working with regional and local authorities to provide alternative energy sources to the frontline areas.

The heating season is underway in Ukraine. On November 17, Russia made a massive missile attack across Ukraine and damaged the critical infrastructure of

the Volyn, Lviv, Odesa, and Vinnytsia regions.

The enemy targeted energy facilities to leave Ukrainians without heat, water, and electricity. Russia will not stop trying to destroy critical infrastructure; our goal is to create a sustainable generation system. We are in touch with community leaders, regional military administrations, and the government.

## CRISIS IN KRYVYI RIH

In the Dnipro region, an emergency meeting of the Headquarters is held to prepare housing and communal services and the fuel and energy sector for the winter period of 2024/25. The headquarters gathered in Kryvyi Rih, where 934 residential buildings, 11 hospitals, and 43 educational institutions, with more than 130 thousand consumers, are currently without heating.

The Ministry for Development appealed to the Security Service of Ukraine and the Ministry of Internal Affairs of Ukraine regarding the disruption of the heating season in Kryvyi Rih.

I heard reports from the city and regional authorities, Naftogaz, Kryvyi Rih CHP, and the State Energy Supervision Service on the reasons for the critical situation. I also invited representatives of law enforcement agencies to the meeting. We must now do everything possible to resolve the problem immediately. Such a situation

is unacceptable in any city or region of the country. In the face of constant shelling, we must think about providing people with basic living services.

Repair works are currently underway in Kryvyi Rih.

The situation is expected to be normalized within a week.

## LATVIA

I was glad to meet with the Latvian Ambassador to Ukraine, Ilgvars Kļava. We are grateful to the Republic of Latvia for its cooperation and constant

support of our country. This exemplifies the concrete work we have been doing calmly and carefully for years. On behalf of the entire Chernihiv region and the Ministry, I sincerely thank you for all the help you provide.

We already have several priority areas in which we want to continue our cooperation. Of course, first and foremost, it is the support of our frontline regions and the protection of energy facilities.

## ITALY

Last week we met with the Ambassador of Italy to Ukraine Carlo Formosa and discussed Italy's plans to implement specific reconstruction projects in the Odesa region.

I thanked the Italian partners for their willingness to cooperate and help Ukraine in times of war, outlined priorities and joint plans to

address the priority needs of Ukraine identified by the Government, and invited them to participate in the Congress of Local and Regional Authorities under the President of Ukraine.

We are forming a significant portfolio of projects with the participation of Italy. It includes the social sphere's construction, agriculture developments, and cultural restoration initiatives. We

are now planning to hold technical meetings and agree on details.

Carlo Formosa said that all implementing projects are in line with the priorities of the Ministry for Development. Earlier, in a joint Ukrainian-Italian Communiqué, Italy announced that it would take patronage of the Odesa region's reconstruction to speed up its recovery from the consequences of Russian aggression.

## WORLD BANK THE WORLD BANK

During the meeting with the Managing Director of Operations at the World Bank, Anna Bjerde, we discussed support projects for the frontline regions and expanding measures to protect energy infra-

structure. We discussed the preparation of RDNA4. Particular attention was paid to the issue of public investment management.

We support the World Bank's initiative to create a mechanism for developing

economically sound investment projects that meet the country's goals – the Ukraine Project Preparation Framework (PPF).

I thanked the World Bank for supporting Ukraine during the war.

## NEW RAILWAY ROUTES TO THE EU

Starting December 15, the route from Kyiv to Bratislava, Slovakia, will be operated by the train Kyiv – Chop – Kyiv and the new train of the Slovak Railways Chop – Bratislava – Chop. This is another step towards Ukraine's integration into the

European Union. We continue to modernize the existing infrastructure and develop rolling stock. I am grateful to the team of Ukrzaliznytsia, the Government, and international partners for the great work done.

The international connection between the capitals of Ukraine and Slovakia aims to

connect Kyiv, Lviv, and Mukachevo with Bratislava and other major cities in neighboring Slovakia (Kosice, Žilina, Trnava, Trenčín, Poprad).

This route was launched as part of the agreements between the governments of Ukraine and Slovakia on infrastructure and logistics development.

## REGIONS DEVELOPMENT

We are preparing an updated Concept for reforming local self-government and territorial organization of power in Ukraine. The decentralization reform in Ukraine is one of the most effective in Ukraine. According to research by the Council of Europe, 77% of Ukrainians believe that the reform of self-government and territorial organization of power should continue. The success of decentralization is also highly appreciated by international experts and partners.

Despite daily challenges, the war and decentralization reform have lasted for ten years. This is our unique experience, which does not exist in any other country. Thanks to the reform, at the beginning of the full-scale invasion, Ukrainian communities became the basis of resistance against the Russian aggressor. The communities continue to be resilient and robust in restoration and development.

Last week Ukrainians commemorated 1000 days

since the Russian full-scale invasion and the Day of Dignity and Freedom which are the important milestones in the modern history of Ukraine on its way to the European Union. Thanks to all the partners who stay on the side of light, Ukraine continues to fight for its future.

**Oleksii KULEBA,**

*Deputy Prime Minister for Restoration of Ukraine – Minister for Development of Communities and Territories of Ukraine*

## KEY FIGURES OF THE WEEK

### UKRAINIAN CORRIDOR

#### TEMPORARY HUMANITARIAN SEA ROUTE

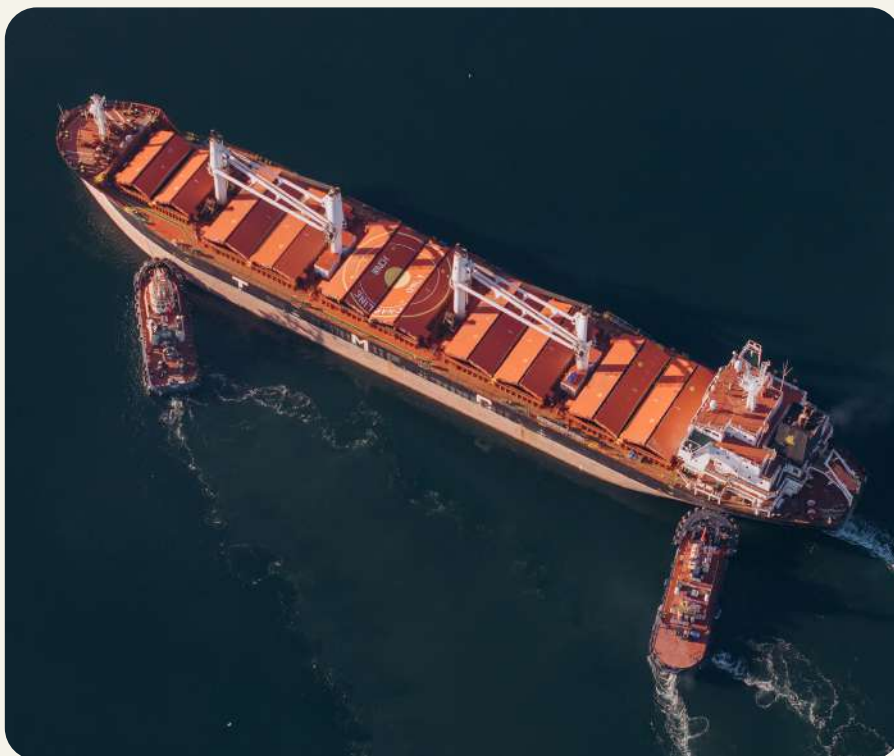

In total, since the beginning of the corridor functioning:

- Arrived: **3154 vessels**;
  - Loading in progress: **24 vessels**.
- Exported:
- grain cargo – **56 mt**;
  - other cargo – **28 mt**;

**TOTAL – 84 mt**

Declared for arrival:

**107 vessels, 3 mt**

### eVIDNOVLENNIA

#### DAMAGED/ DESTROYED HOUSING COMPENSATION PROGRAM

##### DAMAGED HOUSING

(repairs and overhauls)

With a substantial financial commitment of UAH 8 billion, we have approved 76.1 thousand applications for housing restoration.

##### TOP-5 regions:

- Kharkiv
- Kyiv
- Donetsk
- Mykolaiv
- Kherson

##### DESTROYED HOUSING

(buying new housing)

12150 certificates were generated according to applications, and UAH 18.7 billion was approved for payment. 4813 certificates have already been implemented, with a total of

**UAH 8.9 billion.**

##### TOP-5 regions:

- Kharkiv
- Donetsk
- Kyiv
- Kherson
- Mykolaiv

## DESTROYED AND DAMAGED INFRASTRUCTURE\*

Facilities	Damaged or destroyed	Restored
TOTAL:	227 972	51 520
Individual houses	174 085	29 160
Energy	–	10 416
Apartment buildings	22 007	5 734
Life sustenance	9 120	2 818
Education	3 979	903
Social, sports, and cultural facilities	1 931	316
Healthcare	1 684	521
Roads	1 110	486
Administrative and Centres of administrative services	1049	206
Others	13 003	958

\*As of November 22nd, 2024, according to regional military administrations since February 24th, 2022

## RESTORATION PROJECTS: DREAM ANALYTICS\*\*

The Digital Restoration Ecosystem for Accountable Management (DREAM) is a significant milestone in Ukraine's restoration efforts. It's not just a state digital platform for implementing restoration projects but a powerful tool that underscores our unwavering commitment to transparency and accountability.

**8515 projects have been added to DREAM** since the launch of its beta testing in September 2023. The number of projects by sector includes:

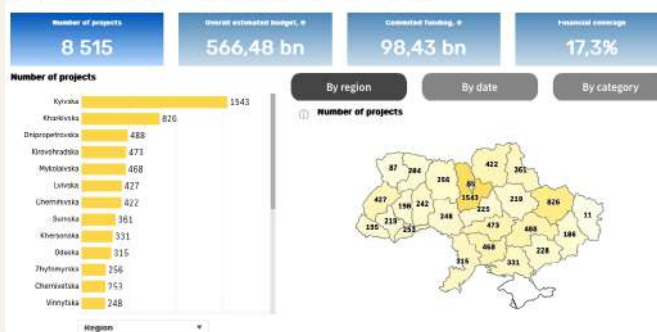

- 3259** projects created in the Education sector
- 1215** projects created in the Healthcare sector
- 946** projects created in the Water, Sanitation, and Waste management sector
- 834** projects created in the Housing sector
- 749** projects created in the Transport sector

### Top 10 regions according to the number of projects in the DREAM:

- Kyiv
- Lviv
- Kharkiv
- Chernihiv
- Dnipropetrovsk
- Sumy
- Kirovohrad
- Kherson
- Mykolaiv
- Odesa

Aetrics

(During the pilot project stage, the analysis results are not official statistics and may be inaccurate.)

\*Digital Restoration Ecosystem for Accountable Management (DREAM) is the state digital platform for implanting restoration projects. DREAM collects, organizes, and publishes open data across all stages of reconstruction projects in real time, implementing the highest standards of transparency and accountability.

\*\* DREAM collects, organizes, and publishes open data across all stages of restoration projects in real time, implementing the highest standards of transparency and accountability. As of now, DREAM contains only a part of restoration projects. Legislation ensuring all restoration projects are included in DREAM is being developed.

All the data on projects in DREAM is available on the public [portal](#) and via the business intelligence [module](#). At the pilot project stage, the analysis results are not official statistics and may need more accuracy. Join the DREAM and find more information concerning investment projects on [dream.gov.ua](https://dream.gov.ua) or write to [info@dream-office.org](mailto:info@dream-office.org)

# STATE BUDGET 2025

*The Verkhovna Rada of Ukraine adopted the State Budget for 2025*

The state budget expenditures are planned to amount to over UAH 3.6 trillion, which is UAH 535 billion more than this year. More than UAH 2.2 trillion (about 26%

of GDP) will be allocated for security and defense.

To support the communities, the personal income tax (PIT) paid in the respective territory

of Ukraine remains at 64%. In addition, no reverse subsidies will be transferred from the territories' budgets where active hostilities have been or are being conducted to the state budget.

## THE BUDGET FOR 2025 ALSO PROVIDES FOR FUNDING FOR:

- **The State Regional Development Fund** – UAH 1 billion
- **eVidnovlennia** UAH 3 billion for the compensation program for destroyed housing and UAH 1 billion for damaged property
- **Railway infrastructure facilities:** renewal of rolling stock for passenger transportation, construction and reconstruction infrastructure – UAH 4.4 billion
- **The civil aviation:** ensuring the functioning of critical infrastructure operators in the sector – UAH 0.8 billion
- maintenance of roads (including the military and evacuation needs) – **UAH 12.6 billion**
- construction of main water pipelines to supply water to Mykolaiv to overcome the consequences of russian blowing up of the Kakhovka HPP – **UAH 8 billion.**

The State Agency for Restoration and Infrastructure Development of Ukraine is provided with funding for:

The state budget for the next year also features introducing a new approach to public investment management (PIM). Its goal is to use budget funds efficiently, directing them to the most important projects that meet the country's strategic goals during the war. The DREAM ecosystem has assembled the Single Project Pipeline, which includes 787 projects worth UAH 2.6 trillion. Funding for UAH 224.2 billion has already been allocated for 2025 to implement the highest-priority projects.

## THE FUNDING INCLUDES THREE MAIN COMPONENTS:

1

### UAH 115 billion

is raised under state guarantees based on international agreements. The funds will be used to restore critical infrastructure, including the transportation network and energy facilities damaged by the hostilities.

2

### UAH 71.8 billion

will come from International Financial Institutions as loans

3

### UAH 36.4 billion

for communities that have been negatively affected by Russia's full-scale armed aggression.

## THE MINISTRY AND WORLD BANK DISCUSSED RDNA 4

The Ministry for Development and the World Bank discussed the preparation of an updated assessment of Ukraine's needs for recovery and reconstruction of RDNA4

The Deputy Prime Minister for Restoration of Ukraine Oleksii Kuleba, met with Anna Bjerde, the Managing Director of Operations at the World Bank

The topics of the talks included preparing the updated Ukraine Rapid Damage and Needs Assessment (RDNA4). The document will serve as the basis for the formation of priority reconstruction and

development projects, with the involvement of public and private funding. Particular attention was paid to the issue of public investment management.

The Ministry for Development paid attention to the issue of public investment management. The Ministry support the World Bank's initiative to create a mechanism for developing eco-

nomically sound investment projects that align with the country's goals – the Ukraine Project Preparation Framework (PPF).

The parties discussed support projects for frontline regions – where people need it most, as well as the expansion of projects to protect energy infrastructure. And also focused on supporting internally displaced persons and building housing for them.

## LATVIA SUPPORTS RESTORATION PROJECTS IN UKRAINE

Latvia to expand support for Chernihiv region recovery projects next year

Latvia remains a reliable and constant partner for Ukraine. Next year, cooperation between the two countries will develop in several areas, including restoring the Chernihiv region, developing transport links, and developing energy security.

This was agreed upon during a meeting of Oleksii Kuleba, Deputy Prime Minister for

Restoration of Ukraine with Ilgvars Kļava, Ambassador of Latvia to Ukraine.

Tymur Tkachenko, Deputy Minister, noted that Ukraine is interested in developing transport logistics and access to the Baltic ports.

Deputy Minister Maryna Denysiuk invited Latvian partners to join the

Operational Group established under the Ukrainian Donors Platform and an Advisory Group under the Agency for Restoration.

Both groups will help coordinate and specify recovery projects. The Operational Group will be a "one-stop shop" for sharing information on urgent recovery and reconstruction needs.

**Tymur TKACHENKO,**  
Deputy Minister  
for Development of  
Communities and  
Territories of Ukraine:

Access to Latvia's port infrastructure is only possible via transit rail service through Poland. Therefore, there is a need to build new terminals to switch wagons to bogies of a different gauge.

The implementation of this project will create an alternative transportation corridor and allow for the formation of a new supply chain.

This, in turn, will increase the volume of cargo transportation and open access for Ukrainian exporters to the port facilities of the Baltic countries.

The two sides agreed to synchronize their efforts to rebuild the Chernihiv region. Ilgvars Kļava assured that in 2025 Latvia will continue to allocate funds to help Ukraine. The focus remains on social sector buildings, such as schools, hospitals, and non-governmental organizations.

According to the ambassador, Latvia needs to make the lives of Chernihiv residents affected by the war more comfortable. That is why many Latvian volunteers are currently

working to help the region. In addition, Latvian energy companies have expressed a desire to provide solar panels for Chernihiv Oblast. The issue of their delivery and installation is currently being resolved.

The head of the State Agency for Restoration and Infrastructure Development, Serhii Sukhomlyn, suggested that the solar panels be transferred to water utilities, where they will be much more efficient.

# UKRAINE FACILITY PLAN IMPLEMENTATION MONITORING

The European Commission's monitoring group visited the Ministry to discuss the implementation of the indicators of the Ukraine Facility Plan

The team of the Ministry for Development of Communities and Territories of Ukraine met with representatives of the European Commission's Directorate-General for Neighborhood Policy and Enlargement Negotiations (DG NEAR).

The parties discussed the status of the implementation of the Ukraine Plan, which provides for

adopting sectoral strategies and relevant regulatory changes.

With regard to Pillar 2, the process of coordination and information exchange on the implementation of the Ukraine Facility program indicators must be as transparent as possible, as this directly affects the receipt of EU funding for recovery projects and support

for the stable functioning of the Ukrainian economy.

The European Commission's monitoring team, headed by Marlene Madsen, Head of Economic and Sectoral Policy, DG NEAR, praised the Ministry's engagement level and the quality and relevance of the information provided on the implementation of the Ukrainian Plan indicators.

## IN TOTAL, THE MINISTRY FOR DEVELOPMENT IS RESPONSIBLE FOR MANAGING 26 INDICATORS OF THE UKRAINE FACILITY PLAN, SUCH AS:

- Ensuring access to housing, compensation for destroyed or damaged housing, restoration, and reconstruction of damaged and destroyed infrastructure - **4 indicators.**
- Decentralization and regional policy - **7.**
- Energy sector, energy efficiency and sustainable heat supply, investments in energy infrastructure - **6.**
- Integrated development of the transport sector and export and logistics potential of Ukraine, investments in transport infrastructure - **7.**
- Public finance management - **1.**
- Business environment - **1 indicator.**

The team of the Ministry for Development of Communities and Territories of Ukraine met with representatives of the European Commission's Directorate-General for Neighborhood Policy and Enlargement Negotiations (DG NEAR).

The parties discussed the status of the implementation of the Ukraine Plan, which

provides for adopting sectoral strategies and relevant regulatory changes.

With regard to Pillar 2, the process of coordination and information exchange on the implementation of the Ukraine Facility program indicators must be as transparent as possible, as this directly affects the receipt of EU funding for recovery projects and support

for the stable functioning of the Ukrainian economy.

The European Commission's monitoring team, headed by Marlene Madsen, Head of Economic and Sectoral Policy, DG NEAR, praised the Ministry's engagement level and the quality and relevance of the information provided on the implementation of the Ukrainian Plan indicators.

Deputy Minister Maryna Denysiuk emphasized that the Ministry's expert team constantly monitors the implementation of the points of the Ukraine Plan and the European Commission's

recommendations. The first pool of projects under Component 2 includes regional water supply projects, assistance to small and medium-sized enterprises in the frontline regions, and technical

support for public investment management reform. The Single Project Pipeline must include all projects involving capital expenditures. This will increase the capacity to attract investment at both the national and local levels.

**Maryna DENYSIUK, Deputy Minister for Development of Communities and Territories of Ukraine:**

From the beginning of the Ukraine Facility, I was part of the team of experts that developed and launched it. I continue to coordinate the plan's implementation regarding indicators and Pillar 2 with the European Commission.

This example demonstrates the consistent approach of the Ukrainian Government, which increases the level of trust in Ukraine on the part of its partners.

In addition, preserving and transferring institutional memory contributes to more effectively implementing the necessary reforms.

During the meeting, she emphasized that the Ministry's experts are constantly monitoring the implementation of the indicators of the Ukraine Plan, as well as the recommendations of the European Commission, as defined in the annual Enlargement Report.

## REGIONS DEVELOPMENT OF UKRAINE

Deputy Minister Oleksii Riabykin took part in the political-level meeting of the European Alliance of Cities and Regions for the Reconstruction of Ukraine.

The Ministry for Development of Communities and Territories of Ukraine is currently focusing significant efforts on integrated regional development, with an additional focus on rebuilding housing for internally displaced persons and building social and critical infrastructure.

The upcoming URC2025 Ukraine Recovery Conference

to be held in Rome should focus on strengthening the capacity and role of communities in the implementation of recovery projects, allocation of financial resources, and implementation reforms.

The Deputy Minister emphasized that on the eve of the event in Rome, the Government

of Ukraine continues to work on a number of reforms. In particular, the decentralization reform, the process of strengthening the role of communities in the recovery and reconstruction processes, and the reintegration of the temporarily occupied territories and internally displaced persons are ongoing.

Oleksii Riabykin noted that in preparation for URC2025, the Ministry for Development plans to hold a thematic event with representatives of local governments, regional state administrations, and development partners (pre-

URC). He took this opportunity to invite the Committee and the Alliance to join the event.

During the political level meeting of the European Alliance of Cities and Regions, the Declaration of Support for the Local and

Regional Dimension in the Reconstruction of our Country was approved. The Alliance will continue to work to strengthen partnerships, share knowledge, and empower Ukrainian local and regional governments on their path to EU membership.

**Oleksii RIABYKIN,  
Deputy Minister  
for Development of  
Communities and Territories  
of Ukraine:**

This meeting will be a milestone between the Ukraine Recovery Conference 2024 (URC2024) and URC 2025, which aims to demonstrate

progress in reform implementation and mobilize international support for Ukraine's recovery. Like last year, the regional and local dimensions will be one of the four main focus areas at URC2025, reflecting the key role of communities and regions in the recovery and Ukraine's path to the EU.

## REFORM AND RECOVERY SUPPORT TEAM STEERING COMMITTEE

On November 20, a meeting of the Steering Committee dedicated to the results of the implementation of the Recovery and Reform Architecture in Ukraine (URA) program in Ukraine was held, the participants of which discussed the results of the work and further plans of the Recovery and Reform Support Team under the Ministry for Development of Communities and Territories of Ukraine.

The working meeting was attended by Deputy Ministers Maryna Denysiuk, Oleksii Riabykin, and Anatolii Komirnyi, Deputy Head of the EBRD Delegation in Ukraine Iryna Kravchenko, Head of the Reconstruction, Energy, Infrastructure and Environment Unit of the EU Delegation to Ukraine Jocelyn Cornet and the Director of the Recovery and Reform Support Team at the Ministry for Development Anatolii Timenko. Maryna Denysiuk expressed gratitude to the partners

for their leadership and unwavering support of Ukraine during Russia's military aggression.

The Deputy Minister also emphasized the importance of cooperation with the Team within the framework of the URA program. In particular, she noted the Team's contribution to preparing and implementing important regulations on Ukraine's path to integration with the EU.

The Deputy Minister also added that the reform

of public investment management (PIM) is currently underway, which is a priority and a priority.

The purpose of the reform is to create a holistic, sustainable, and effective management system that will ensure the planning of investment projects by strategic priorities and medium-term budget frameworks, their selection according to uniform, transparent procedures and clear criteria, as well as their timely implementation within the planned timeframe.

According to Deputy Minister Oleksii Riabykin, the Ministry team fundamentally supports the activities of the Recovery and Reform Support Team. It seeks to expand and strengthen our cooperation per the wartime requirements. First, this concerns the reform of decentralization and the reintegration of temporarily occupied territories. We perceive the temporarily occupied territories as a separate macro-region

with needs, challenges, and tasks that must be effectively addressed. We have a lot of work ahead of us, so we continue to work for results.

Deputy Minister and CDTO Anatolii Komirnyi noted the significant contribution of RST to the implementation of digital projects developed by the Ministry. This applies to the Register of Damaged and Destroyed Property launch,

the urban planning cadastre, the eQueue project, etc. There needs to be more than just launching any electronic service at the state level to develop a digital product. Much work must be done to amend the legislation to legalize the service and protect the product properly. That is why technical support from RST experts and project managers is very important in regulating all procedures.

Donors noted that it is important for them to work with the ministry as the most attentive institution in implementing recovery. Considering PIM's investment policy, they also understand the need to expand the team.

For his part, the Director of the Team, Anatolii Timenko, spoke in detail about the achievements and most important developments of the Team over the past year, as well as outlined plans and

priorities of work. In particular, the central area of work is implementing EU law to Ukrainian legislation within the defined reform priorities and indicators of the Plan of Ukraine.

The Architecture for Recovery and Reforms in Ukraine (URA) is a comprehensive technical assistance program implemented by the European Bank for Reconstruction and Development (EBRD)

in partnership with the European Union to support important recovery and reform processes in Ukraine. URA is implemented with the financial support of the EBRD's Multilateral Donor Fund for Stabilization and Sustainable Development of

Ukraine. The participants of the Foundation are Austria, Denmark, Finland, France, Germany, Italy, Japan, Latvia, the Netherlands, Norway, Poland, Sweden, Switzerland, the United Kingdom, the United States and the European Union.

**Anatolii TIMENKO, Director of Recovery and Reform Support Team at the Ministry for Development of Ukraine:**

The team's experts are developing important regulations, strategies, and action plans for transport and infrastructure, housing and communal services, and energy efficiency.

These documents have a qualitative impact on the further development of each sector, are developed by the Ukraine Plan, and allow for tangible progress on Ukraine's path to the European Union.

**Maryna DENYSIUK, Deputy Minister for Development of Communities and Territories of Ukraine:**

We are grateful to the EBRD for its comprehensive support in building institutional capacity, developing transport infrastructure, increasing community resilience, and implementing long-term solutions for sustainable recovery.

The Recovery and Reform Support Team is integral to the Ministry's work. RST experts provide technical support to the Ministry in developing and implementing priority sectoral reforms. Considering the difficult situation in Ukraine due to the war and the many reforms that need to be carried out to approximate Ukrainian legislation to EU law, we look forward to further support from the EBRD.

## ENERGY EFFICIENCY – GREEN DIM PROGRAM

The Energy Efficiency Fund has already received 100 applications for participation in the Green DIM program

The potential threat of blackouts has become a powerful incentive for condominiums to protect themselves, especially during the 2024–2025 heating season. Co-owners are looking for ways to guarantee the energy independence of their buildings to ensure the uninterrupted operation of critical utilities: lighting, elevators, and pumps for water and heat supply.

**A program from the Energy Efficiency Fund, Green DIM, which provides grants to condominiums across Ukraine, helps to implement such tasks. The leading regions in terms of the number of applications:**

- 40 – Kyiv region
- 22 – Lviv region
- 9 – Mykolaiv region
- 8 – Rivne region
- 6 – Dnipro region

Most applications involve the installation of solar power plants (SPPs). This solution ensures partial energy independence of buildings and avoids extended power outages. Using solar power plants also significantly reduces the cost of maintaining buildings, including electricity.

The number of applications for participation in the Green DIM Program is growing monthly. This demonstrates the interest of condominiums in implementing alternative energy projects.

The total cost of the submitted projects as of November 18, 2024, is UAH 146.864 million, and the expected amount of grants is UAH 97.242 million.

Thanks to the Green DIM Program, SPPs with a total capacity of 2.8 MW will be installed, reducing electricity consumption by 3.4 GW, more than UAH 13.07 million in cost savings.

Currently, the Energy Efficiency Fund has the potential to support several hundred more projects to install alternative energy sources, which will help thousands of Ukrainians go through the 2024-2025 heating season without complications and save significant money on building maintenance.

**Thank you**  
for attention

Ministry for Development  
of Communities  
and Territories of Ukraine
